The Russian minister of Defence, P.Σοιγκού, contacted twice in three days with his American counterpart, L. Austin, and then with the state DEPARTMENT.MT. Britain, France and Turkey, informing them of imminent use of dirty nuclear bomb by the Ukrainian Armed Forces.

Russian sources emphasize *“the P.Σοιγκού informed the ministers of Defence, united states, Turkey, Britain and France for the seriousness of the situation. A dirty nuclear bomb can be carried in a car and blow up at any time”*.

Russian state MEDIA are reporting that the *“Kiev has started the practical implementation of this εφιαλτικού design”*, which means that we're in the final stretch, as has been analysed in two articles from the WarNews247:

Russian SMES: an Imminent nuclear explosion in Ukraine!

Russian state MEDIA reported, in particular:

“There is information that the regime in Kiev is preparing a challenge in its territory on the explosion of a so-called dirty bomb or nuclear weapon of low performance.

The purpose of the challenge is to be blamed Russia that uses weapons of mass destruction in the Ukrainian theater of operations, and therefore to launch a strong anti-Russian campaign in the world with the aim to undermine confidence in Moscow.

From various sources it became known that under the leadership of western curators, Kiev has already started the practical implementation of this plan.

The leadership of the east factory, mining and processing, which is located in the city of Zhovti Vody, in the region Dnepropetrovsk, as well as of the Institute for Nuclear Research of Kiev, was tasked with the construction of the very "dirty bomb". The tasks that are already in the final stage.

At the same time, for the account of the second. Ζελένσκι, officials of the Office of the President of Ukraine by the close of the environment, carry out, hidden contacts with representatives of the United Kingdom for the issue of a possible transfer of components of nuclear weapons to the Kiev authorities.

The calculation of the "brains" of the challenge is that, if successfully implemented the plan, most countries will react extremely hard in a "nuclear incident" in Ukraine.

As a result, Moscow will lose the support of many of the key partners and the West will try again to raise the issue of the withdrawal from Russia to the status of a permanent member of the UN Security Council and to increase the anti-Russian rhetoric.

The so-called "dirty bomb" combines radioactive material with conventional explosives.

P.Shougu: Two phone communications with the minister of Defense of the USA!

The minister of Defence of Russia **had today and the second in three days in** a telephone conversation with his American counterpart Lloyd Austin, has announced the Russian ministry of Defense.

Moscow gave no other information about the content of the conversation, but according to Russian sources, **the Σοϊγκού warned not to exceed the red line, and can't conceive of Ukraine to detonate a nuclear bomb.**

For the minister of Defence of Russia this is a very intensive talks in one day for the first time since the start of the Russian attack at the end of February.

The last time the Russian defense ministry reported for the contacts of the Σοϊγκού with Austin was in May of this year.

The Russian MINISTRY.AM informed Britain, France and Turkey

The Russian minister of Defense Sergei Σοϊγκού contacted then with his French

counterpart Sebastian Λεκόρνου.

It is known that they discussed the situation in Ukraine, which, according to the Σοιγκού, has been a steady trend towards further uncontrolled escalation.

The Σοιγκού transferred to the French counterpart of the concerns about potential challenges from Ukraine with **the use of a "dirty bomb" (a nuclear weapon low performance)**.

In addition, the Σοιγκού spoke today with the British Defense minister Ben Wallace.

The topic of discussion was the same – the possible use of a **"dirty bomb" by the regime of Kiev**.

The Σοιγκού had a similar conversation with the Turkish minister of Defence Χουλουσί Ακάρ.

Confirms France!

The Σοιγκού also mentioned, such as the counterparts of Χουλουσί Ακάρ and Ben Wallace, for Russian ***"concerns associated with possible provocative actions on the part of Ukraine by the use of a "dirty bomb"***

The ministry of Defence of France, confirmed with an announcement of the reference to **"Russian fears" to blow "with a dirty bomb from the Ukrainians in their territory to lay the blame on Russia"**.

Sébastien Λεκορνύ recalled that ***"France denies any form of escalation, especially nuclear"***, also highlighting the determination of France ***to "contribute to a peaceful resolution of the conflict, on the side of the allies"***.

Rejected his claims Shoigu Wallace

The minister of Defence of Britain, Ben Wallace rejected the claims made by a telephone communication of the Russian counterpart Sergei Shoigu that the western countries will facilitate the design of Kiev for escalation of the war in Ukraine.

"The secretary of Defense rejected these claims, and drew attention to the fact that these claims should not be used as a pretext for greater escalation", refers to the communication of the british ministry of Defence.
